

Treasure Island Road and Ditch Commissioner

April 2022 Report

Road condition, we have a few areas that are not draining well even with light rain specifically on the East side of the island inside lots. Dave Parker has been helping me assess what we need to do about this. We will be placing some better drain pipes in the ditch so be aware there will be some work on the easement, which could be at the base of driveways. We will let you know when. The problem is water coming down driveways not going to the ditch instead crossing the road than down driveways on the water side of the island. This can also erode the asphalt on the road over time.

Speeding across the bridge and on the island roads has continued to be a problem. The possibility of placing another speed bump on the road going up from the bridge will be discussed at our next board workshop. Still waiting to hear back from the Mason County Sheriff if we can have a temporary speed trailer on the island that records how fast you are going. From what I've been told it does help by recording time of day or night when it's the busiest. The Sheriff will do an area check at that time and hopefully stop the speeders. BTW then can issue speeding tickets on our roads.
